

ABRAHAM DUNO

Full-Stack Developer for Web, App, and Game Platforms

SUMMARY

With over 5 years of experience in front-end and back-end development across multiple platforms, I am a highly skilled and seasoned developer. Throughout my career, I have gained expertise in developing interactive and intuitive digital experiences in more than 100 software projects, such as games, websites, apps, shops, blogs, and code packages. I am experienced in using frameworks such as Laravel, Next.js, Three.js, Jest, and Hardhat for development and testing of various applications. In general, I prioritize clean code, enhancing the user experience, and focusing on online/offline data synchronization.

LANGUAGES

- o Spanish (Native)
- o English (Advanced)

KEY SKILLS

- o Creating engaging and interactive websites, apps, and games: I have a passion for creating interactive and intuitive digital experiences. Throughout my career, I always keep the user's engagement in mind.
- o Excelling in team projects and leadership: I am an excellent team player and have excelled in various team projects, where I have contributed to the design and development of high-quality software. I am also skilled in leadership and can guide teams to success.
- o Expert in reactive web layout development: I have vast expertise in developing reactive web layouts for all screen sizes. I understand the importance of responsive design and the impact it has on user experience.
- o Skilled in using frameworks such as Laravel, Next.js, and Hardhat: I am proficient in using various types of frameworks for the back-end, front-end or blockchain environments. These frameworks help me to work fast and efficiently while also delivering clean code.
- o Highly experienced in native JS and its libraries such as Vue, React, ThreeJS, Nextjs: I also have extensive knowledge of core functionalities of JS and the advantages of ECMAScript.
- o Developing smart contracts. I have experience in creating smart contracts that are evm-readable. I understand the security concerns of smart contracts, and have a deep understanding of their functionality.
- o Proficient in creating MVC projects, including design, development from scratch, and implementation.
- o Experienced in building cross-platform PWAs using Ionic or Xamarin: I have experience in building cross-platform PWAs using Ionic and Xamarin. I understand the intricacies of cross-platform development and can develop software that works seamlessly on multiple platforms or devices.
- o Knowledgeable in ECommerce frameworks such as WordPress and PrestaShop. These frameworks help me to build high-quality e-commerce websites, portfolios, and blogs.
- o Skilled in mobile application database design and development, including offline data synchronization. This means that the mobile apps I develop can work seamlessly even

without an internet connection.

WORK EXPERIENCE

o Front-End Multi-platform Developer at Wao (2017 – 2018)

- * Developed web apps and landing pages using native HTML5 and UI frameworks (Bootstrap and Semantic).
- * Developed cross-platform (PWAs) using Ionic and Xamarin, including responsive ux and offline data sync support.
- * Designed, developed and implemented advanced JavaScript web admin panel tools, enhancing user experience and data management.

o Full-Stack Web & Mobile Developer at Digilink C.A. (2018 - 2023)

- * Developed several web apps for clerk dashboards using vanilla JS, providing real-time reporting and data visualization for managers.
- * Designed and developed a multi-role web app for staff schedule tracking and payroll reporting using Laravel, MySQL, Vue 2, and Semantic UI, reducing time spent on manual data entry and increasing overall productivity.
- * Developed web apps using Xamarin and SQLite for mobile offline data synchronization.
- * Created e-commerce, portfolio, and blog websites using WordPress and PrestaShop, including custom plugins and themes from developed scratch.
- * Troubleshooted and resolved several issues with a complex e-commerce website using PrestaShop, resulting in a highly functional and user-friendly site.
- * Expanded leadership skills by mentoring junior developers, leading team meetings, and delegating tasks to ensure timely delivery of projects.
- * Led a team of developers in front-end development for web apps.

Front-end Web Developer at ServicePad C.A. (2022 - Present)

- * Collaborated with the development and design team to create a user-friendly and intuitive UI/UX.
- * Developed a fully-equipped inventory system with 2D and 3D components using NextJs and ThreeJs, and utilized problem-solving skills to troubleshoot and resolve several issues with the system's functionality.
- * Worked with the backend team to integrate the backend systems with the front-end code.
- * Implemented a responsive design to ensure the app was optimized for use on all devices, and incorporated creative design solutions to enhance the overall user experience.
